

TAESAN REST API

Overview

금융 절약 플랫폼 TAESAN의 API 명세서입니다

Paths

POST `/api/analyst-management/analysts/place/analyst` 장소 카테고리 분석 정보 불러오기

카테고리 분석에서 장소에 대한 분석 정보를 불러오는 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST `/api/analyst-management/analysts/receipt` 영수증 등록

클로버 OCR API와 연동하여 영수증을 등록하는 API

Responses

Code	Description	Links
200	OK Content /	No Links

POST `/api/analyst-management/analysts/receipt/analyst` 영수증 카테고리 분석 정보 불러오기

카테고리 분석에서 영수증에 대한 분석 정보를 불러오는 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET `/api/analyst-management/analysts/receipt/test` 더미 영수증 등록

정해진 영수증 OCR 결과를 반환하는 API

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/asset-management/assets/account/list getMyAccountList

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/asset-management/assets/authenticate connectAssets

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean

Type	Name	Description	Schema
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET [/api/asset-management/assets/card/list](#) getMyCardList

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET **/api/asset-management/assets/main** getMyAssetsInMainPage

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST **/api/asset-management/assets/transfer** transfer

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean

Type	Name	Description	Schema
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/asset-management/assets/{card_id}/pay pay

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
path	card_id required	card_id	integer (int64)
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/auth-management/auths/password/check verifyPassword

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/auth-management/auths/simple-password/check verifySimplePassword

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean

Type	Name	Description	Schema
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/auth-management/auths/sms/check verifySMS

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/auth-management/auths/sms/send sendSms

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/challenge-management/challenges/exit/{id} 챌린지에서 나가기

챌린지 id로 챌린지에서 나가기 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean

Type	Name	Description	Schema
query	accountNonExpired optional		boolean
path	id required	id	integer (int64)
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/challenge-management/challenges/expired 종료 챌린지 조회

종료된 챌린지를 조회하는 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET **/api/challenge-management/challenges/expired/{id}** 종료 챌린지 상세 조회

챌린지 ID를 인자로 해당 종료된 챌린지 상세 조회 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
path	id required	id	integer (int64)
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST **/api/challenge-management/challenges/join** 코드로 챌린지 참가

uuid로 해당 챌린지 참여 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/challenge-management/challenges/new 챌린지 생성

기간과 목표기간을 입력하고 챌린지 생성하는 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean

Type	Name	Description	Schema
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/challenge-management/challenges/progress/{id}

진행중인 챌린지 상세 조회

챌린지 ID를 인자로 진행중인 챌린지 상세 조회 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
path	id required	id	integer (int64)
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/challenge-management/challenges/recruit/{id}

모집중인 챌린지 상세 조회

챌린지 ID를 인자로 해당 모집중인 챌린지 상세 조회 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
path	id required	id	integer (int64)
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/challenge-management/challenges/save/{id}

종료챌린지 저금하기

종료된 챌린지에 대해서 저금하는 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string

Type	Name	Description	Schema
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
path	id required	id	integer (int64)
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/challenge-management/challenges/start/{id} 챌린지 시작하기

챌린지 id로 챌린지 시작하기 API

Parameters

Type	Name	Description	Schema
path	id required	id	integer (int64)

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/challenge-management/challenges/state 챌린지 상태 조회

사용자의 챌린지 상태를 조회한다 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

DELETE /api/challenge-management/challenges/{id} 챌린지 제거하기

API

Parameters

Type	Name	Description	Schema
path	id required	id	integer (int64)

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/habit-management/habits 습관 생성

습관을 생성한다.

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/habit-management/habits/complete 종료된 습관 조회

종료한 습관을 조회한다.

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean

Type	Name	Description	Schema
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/habit-management/habits/progress **진행중인 습관 조회**

진행중인 습관을 조회한다.

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

PUT /api/habit-management/habits/progress/{habitId}

습관 종료

습관 id 를 전송하여 습관을 종료한다.

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
path	habitId required	habitId	integer (int64)
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/habit-management/habits/today

오늘 아낀 습관 목록 조회

오늘 아낀 습관을 조회한다.

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/habit-management/habits/today 오늘 아낀 습관 저금

오늘 아낀 습관들을 저금한다.

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean

Type	Name	Description	Schema
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/habit-management/habits/total-calendar/{year}/{month} 전체 습관 달력 조회

월을 입력하여 월별 전체 습관 달력을 조회한다 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
path	month required	month	integer (int32)
path	year required	year	integer (int32)
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/habit-management/habits/total-calendar/{year}/{month}/{day} 전체 습관 달력 상세 조회

월과 일을 입력하여 전체 습관 달력 상세 조회한다 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
path	month required	month	integer (int32)
path	year required	year	integer (int32)
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
path	day required	day	integer (int32)
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/habit-management/habits/{habitId} 습관 상세 조회

습관 id로 습관을 조회한다.

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
path	habitId required	habitId	integer (int64)
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/habit-management/habits/{habitId}/calendars/{year}/{month} 습관 달력 조회

습관 id와 월을 입력하여 습관 달력을 조회한다.

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
path	month required	month	integer (int32)

Type	Name	Description	Schema
path	year required	year	integer (int32)
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
path	habitId required	habitId	integer (int64)
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/ifbuy-management/ifbuys **샷다치고 목록 가져오기**

샷다치고에 들어갔을 때 등록된 샷다치고의 목록을 가져오는 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean

Type	Name	Description	Schema
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/ifbuy-management/ifbuys 샀다치고 등록하기

샀다치고에 물건을 등록하는 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/ifbuy-management/ifbuys/image/{path} 이미지 불러오기

태산 서비스로부터 이미지를 불러오는 API

Parameters

Type	Name	Description	Schema
path	path required	path	string

Responses

Code	Description	Links
200	OK Content /	No Links

DELETE /api/member-management/members 회원 탈퇴

회원 탈퇴 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/member-management/members/account 계좌 등록

회원 탈퇴 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/member-management/members/check 아이디 중복 체크

회원가입할 아이디를 입력하고 중복체크하는 API

Parameters

Type	Name	Description	Schema
query	id required	id	string

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/member-management/members/check/access-token access-token 유효성 검사

accessToken 유효성 검사 API

Responses

Code	Description	Links
200	OK Content /	No Links

POST **/api/member-management/members/check/token** token 유효성 검사

refreshtoken 유효성 검사 API

Responses

Code	Description	Links
200	OK Content /	No Links

GET **/api/member-management/members/info** 회원 정보 조회

회원 정보를 조회하는 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

PUT /api/member-management/members/info 회원 정보 수정

회원 정보를 수정하는 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/member-management/members/issue access token 재발급

accesstoken 재발급을 진행하는 API

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/member-management/members/join 회원 가입

회원 정보를 입력하고 회원 가입을 진행하는 API

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/member-management/members/login 로그인

아이디, 비밀번호 입력하고 로그인을 진행하는 API

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/member-management/members/logout 로그아웃

세션 종료 및 로그아웃을 진행하는 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

PUT /api/member-management/members/password 회원 비밀번호 수정

회원 비밀번호를 수정하는 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/member-management/members/simple-login 간편 로그인

간편 비밀번호 입력하고 로그인을 진행하는 API

Responses

Code	Description	Links
200	OK Content /	No Links

PUT /api/member-management/members/simple-password 회원 간편 비밀번호 수정

회원 간편 비밀번호를 수정하는 API

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/asset-management/tickle getMyTickleInfo

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean

Type	Name	Description	Schema
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/asset-management/tickle createTickle

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

DELETE /api/asset-management/tickle deleteTickle

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/asset-management/tickle/category getCategory

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean

Type	Name	Description	Schema
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/asset-management/tickle/history getPayHistories

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/transactions/card/{cardId} 카드 카테고리 상세내역

패턴분석에서 위치 카테고리의 상세 내용

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	month required	month	string
query	year required	year	string
query	credentialsNonExpired optional		boolean
path	cardId required	cardId	integer (int64)
query	accountNonExpired optional		boolean
query	category required	category	string
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/transactions/history/{cardId} 기본 거래내역 목록 불러오기

카드Id, 불러올 cursor, 가져올 크기 지정

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	cursor optional	cursor	integer (int64)
query	password optional		string
query	credentialsNonExpired optional		boolean
path	cardId required	cardId	integer (int64)
query	limit required	limit	integer (int32)
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET **/api/transactions/oftenTransaction** 자주 쓰는 카테고리 목록 불러오기

습관 생성 등에서 자주 쓰는 카테고리 목록 및 가격 불러오기

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean

Type	Name	Description	Schema
query	accountNonExpired optional		boolean
query	enabled optional		boolean
query	accountNonLocked optional		boolean
query	username optional		string

Responses

Code	Description	Links
200	OK Content /	No Links

GET `/api/transactions/receipt/{cardId}` 영수증 카테고리 상세내역

패턴분석에서 영수증 카테고리의 상세 내용

Parameters

Type	Name	Description	Schema
query	month required	month	string
query	year required	year	string
path	cardId required	cardId	integer (int64)
query	category required	category	string

Responses

Code	Description	Links
200	OK Content /	No Links

GET `/api/transactions/{transactionId}/receipt` 거래내역에 대한 영수증 목록 불러오기

거래내역을 눌렀을 때 등록된 영수증에 대한 정보 불러오기

Parameters

Type	Name	Description	Schema
path	transactionId required	transactionId	integer (int64)

Responses

Code	Description	Links
200	OK Content /	No Links

POST /api/transactions/{transactionId}/receipt 영수증 정보 등록하기

분석이 완료된 영수증 정보를 등록

Parameters

Type	Name	Description	Schema
path	transactionId required	transactionId	integer (int64)

Responses

Code	Description	Links
200	OK Content /	No Links

GET /api/transactions/{transactionId}/{cardId}/detail 상세 거래내역 불러오기

위의 거래내역 목록에서 transactionId를 통해 검색

Parameters

Type	Name	Description	Schema
query	authorities[0].authority optional		string
query	password optional		string
query	credentialsNonExpired optional		boolean
path	cardId required	cardId	integer (int64)

Type	Name	Description	Schema
query	accountNonExpired optional		boolean
query	enabled optional		boolean
path	transactionId required	transactionId	integer (int64)
query	accountNonLocked optional		boolean
query	username optional		string

Responses

error optional		ApiError
response optional		object
success optional		boolean

AssetResponse

Title: AssetResponse

Properties

Name	Description	Schema
account optional		Account
cardList optional		< Card > array
connectedAsset optional		boolean
createdTickle optional		boolean

Card

Title: Card

Properties

Name	Description	Schema
cardCompany optional		string
cardId optional		integer (int64)
cardNumber optional		string
cardType optional		string

CardListResponse

Title: CardListResponse

Properties

Name	Description	Schema
cardList optional		< Card > array

CardResponse

Title: CardResponse

Properties

Name	Description	Schema
card optional		Card
sumPrice optional		integer (int64)
transactionDT OS optional		< TransactionDT O > array

ChallengeExpiredDetailResponse

Title: ChallengeExpiredDetailResponse

Properties

Name	Description	Schema
endDate optional		string (date-time)
participants optional		< ParticipantResponse > array
price optional		integer (int64)
spare optional		integer (int64)
startDate optional		string (date-time)

Name	Description	Schema
title optional		string

ChallengeMakeRequest

Title: ChallengeMakeRequest

Properties

Name	Description	Schema
period optional		integer (int32)
price optional		integer (int64)
title optional		string

ChallengeMakeResponse

Title: ChallengeMakeResponse

Properties

Name	Description	Schema
challengeld optional		integer (int64)
state optional		integer (int32)

ChallengeProgressDetailResponse

Title: ChallengeProgressDetailResponse

Properties

Name	Description	Schema
creator optional		boolean
endDate optional		string (date-time)
participants optional		< ParticipantResponse > array
price optional		integer (int64)
spare optional		integer (int64)
title optional		string

ChallengeRecruitDetailResponse

Title: ChallengeRecruitDetailResponse

Properties

Name	Description	Schema
creator optional		boolean
participantNames optional		< string > array
period optional		integer (int32)

Name	Description	Schema
price optional		integer (int64)
title optional		string
uuid optional		string

ChallengeResponse

Title: ChallengeResponse

Properties

Name	Description	Schema
endDate optional		string (date-time)
exchange optional		boolean
id optional		integer (int64)
price optional		integer (int64)
spare optional		integer (int64)
startDate optional		string (date-time)
title optional		string

ClearHabitResponse

Title: ClearHabitResponse

Properties

Name	Description	Schema
habitId optional		integer (int64)
habitTitle optional		string
targetMoney optional		integer (int32)

CreateHabitRequest

Title: CreateHabitRequest

Properties

Name	Description	Schema
habitName optional		string
targetMoney optional		integer (int32)
title optional		string
type optional		integer (int32)

HabitCalendarResponse

Title: HabitCalendarResponse

Properties

Name	Description	Schema
day optional		integer (int32)
month optional		integer (int32)
saving optional		integer (int64)
year optional		integer (int32)

HabitListResponse

Title: HabitListResponse

Properties

Name	Description	Schema
endDate optional		string (date-time)
habitId optional		integer (int64)
habitName optional		string
saving optional		integer (int64)
savingCnt optional		integer (int64)
startDate optional		string (date-time)
title optional		string

IfbuyItem

Title: IfbuyItem

Properties

Name	Description	Schema
id optional		integer (int64)
img optional		string
name optional		string
price optional		integer (int64)

IfbuyListResponse

Title: IfbuyListResponse

Properties

Name	Description	Schema
balance optional		integer (int64)
bank optional		string

Name	Description	Schema
item_list optional		< IfbuyItem > array
most_buy optional		string
most_buy_price optional		integer (int64)
tikkle optional		integer (int64)

IfbuyRegisterRequest

Title: IfbuyRegisterRequest

Properties

Name	Description	Schema
name optional		string
price optional		string

IfbuyRegisterResponse

Title: IfbuyRegisterResponse

Properties

Name	Description	Schema
price optional		integer (int64)
saved_money optional		integer (int64)

Info

Title: Info

Properties

Name	Description	Schema
id optional		string
label optional		string
value optional		integer (int64)

MemberInfoResponse

Title: MemberInfoResponse

Properties

Name	Description	Schema
address optional		Address
email optional		string
name optional		string
phone optional		string

MemberJoinRequest

Title: MemberJoinRequest

Properties

Name	Description	Schema
address optional		string
addressDetail optional		string
email optional		string
loginId optional		string
name optional		string
password optional		string
phone optional		string
simplePassword optional		string
zipCode optional		string

MemberLoginRequest

Title: MemberLoginRequest

Properties

Name	Description	Schema
autoLogin optional		boolean
loginId optional		string
password optional		string

MemberModifyRequest

Title: MemberModifyRequest

Properties

Name	Description	Schema
address optional		Address
email optional		string

MessageRequest

Title: MessageRequest

Properties

Name	Description	Schema
to optional		string

OCRReceiptDTO

Title: OCRReceiptDTO

Properties

Name	Description	Schema
name optional		string
sumPrice optional		integer (int64)
unitPrice optional		integer (int64)

OCRReceiptList

Title: OCRReceiptList

Properties

Name	Description	Schema
list optional		< OCRReceiptDT O > array
sumPrice optional		integer (int64)

OftenCategory

Title: OftenCategory

Properties

Name	Description	Schema
category optional		string
count optional		integer (int64)
dateMoney optional		integer (int64)
money optional		integer (int64)
type optional		integer (int32)

ParticipantResponse

Title: ParticipantResponse

Properties

Name	Description	Schema
name optional		string
spare optional		integer (int64)

ParticipateRequest

Title: ParticipateRequest

Properties

Name	Description	Schema
uuid optional		string

PayHistoryResponse

Title: PayHistoryResponse

Properties

Name	Description	Schema
createDate optional		string (date-time)
totalAmount optional		integer (int64)
transAmount optional		integer (int64)

PlaceAnalystRequest

Title: PlaceAnalystRequest

Properties

Name	Description	Schema
month optional		string
year optional		string

PlaceAnalystResponse

Title: PlaceAnalystResponse

Properties

Name	Description	Schema
infos optional		< Info > array
month optional		string
year optional		string

ReceiptAnalystRequest

Title: ReceiptAnalystRequest

Properties

Name	Description	Schema
month optional		string
year optional		string

ReceiptAnalystResponse

Title: ReceiptAnalystResponse

Properties

Name	Description	Schema
infos optional		< Info > array
month optional		string
year optional		string

ReceiptDTO

Title: ReceiptDTO

Properties

Name	Description	Schema
category optional		string
price optional		integer (int64)
productName optional		string

ReceiptListResponse

Title: ReceiptListResponse

Properties

Name	Description	Schema
receipts optional		< ReceiptDTO > array
sumPrice optional		integer (int64)

ReceiptReqDto

Title: ReceiptReqDto

Properties

Name	Description	Schema
price optional		integer (int64)
productName optional		string

ReceiptRequest

Title: ReceiptRequest

Properties

Name	Description	Schema
productList optional		< ReceiptReqDto > array

ReceiptResultResponse

Title: ReceiptResultResponse

Properties

Name	Description	Schema
productList optional		< ReceiptDTO > array

RecentTransaction

Title: RecentTransaction

Properties

Name	Description	Schema
count optional		integer (int64)
sum optional		integer (int64)

ResultResponse

Title: ResultResponse

Properties

Name	Description	Schema
result optional		string

SaveHabitRequest

Title: SaveHabitRequest

Properties

Name	Description	Schema
habitIds optional		< integer > array

SimpleLoginRequest

Title: SimpleLoginRequest

Properties

Name	Description	Schema
simplePassword optional		string

SmsResponse

Title: SmsResponse

Properties

Name	Description	Schema
requestId optional		string
requestTime optional		string (date-time)
smsConfirmNum optional		string

Name	Description	Schema
statusCode optional		string
statusName optional		string

TaesanPayRequest

Title: TaesanPayRequest

Properties

Name	Description	Schema
pay_amt optional		integer (int64)
shopName optional		string

TikkleCategoryResponse

Title: TikkleCategoryResponse

Properties

Name	Description	Schema
challenge optional		integer (int64)
habit optional		integer (int64)
ifbuy optional		integer (int64)
total optional		integer (int64)

TikkleCreateRequest

Title: TikkleCreateRequest

Properties

Name	Description	Schema
endDate optional		string (date-time)

TikkleInfoResponse

Title: TikkleInfoResponse

Properties

Name	Description	Schema
curMoney optional		integer (int64)
endDate optional		string (date-time)
futureMoney optional		integer (int64)

TokenResponse

Title: TokenResponse

Properties

Name	Description	Schema
accessToken optional		string
refreshToken optional		string
userId optional		integer (int64)

TransactionDTO

Title: TransactionDTO

Properties

Name	Description	Schema
approvedAmount optional		integer (int64)
approvedNum optional		string
cardHistoryId optional		integer (int64)
cardType optional		string
category optional		string
dateTime optional		string (date-time)
shopName optional		string
shopNumber optional		string
transactionId optional		integer (int64)

TransactionListResponse

Title: TransactionListResponse

Properties

Name	Description	Schema
card optional		Card
cursor optional		string
historyNum optional		string
transactionDTOList optional		< TransactionDTO > array

TransactionResponse

Title: TransactionResponse

Properties

Name	Description	Schema
recentHistories optional		RecentTransaction
transactionDTO optional		TransactionDTO

VerifyPasswordRequest

Title: VerifyPasswordRequest

Properties

Name	Description	Schema
password optional		string

VerifySimplePasswordRequest

Title: VerifySimplePasswordRequest

Properties

Name	Description	Schema
simplePassword optional		string

VerifySmsRequest

Title: VerifySmsRequest

Properties

Name	Description	Schema
phone optional		string
sms optional		string
